Open access források

Jaka Bizja et al: [Reducing Air Pollution in Rural Areas with Hybrid Heat Pump Supported by Biomass Boiler](#) (2026)

DOI: 10.3390/en19174216

(Adatbázis: MDPI)

Rafael Herrera-Aquino et al: [From Microplastics to Multifunctional Magnetic Nanomaterials: A Circular Strategy for Water Remediation](#) (2026)

DOI: 10.3390/molecules31173117

(Adatbázis: MDPI)

Xiaolin Gan et al: [Green Consumption Orientation and Purchase Intentions Toward Other Ethical Products: The Mediating Roles of Warm Glow and Moral Self-Regulation](#) (2026)

DOI: 10.3390/su18179161

(Adatbázis: MDPI)

Tarek Al-Rimawi et al: [Uncovering Obstacles and Limitations of Smartness: A Cross-Case Analysis of Smart Cities and Smart Real Estate](#) (2026)

DOI: 10.3390/smartcities9090144

(Adatbázis: MDPI)

Miriam Rafai: [Rabbi Sacks' Ethics for Ecological and Cultural Climate Change](#) (2026)

DOI: 10.3390/rel17091028

(Adatbázis: MDPI)

Huer Shuang et al: [The Operational Logic of Ecocentrism and Its Critical Reflection: A Žižekian Analysis of Ideological Fantasy](#) (2026)

DOI: 10.3390/h15080117

(Adatbázis: MDPI)

Samal Adylkhanova et al: [Ethics of Responsibility in the Contemporary World](#) (2026)

DOI: 10.3390/philosophies11040137

(Adatbázis: MDPI)

Chelo Escrig Rondán et al.: [Mulch Films: Degradation Analysis and Ecotoxicological Assessment in Marine and Terrestrial Environments](#) (2026)

DOI: 10.3390/microplastics5030175

(Adatbázis: MDPI)

Guilherme Henrique da Silva et al.: [Biogas Production from the Anaerobic Co-Digestion of Elephant Grass Juice and Cattle Wastewater: Batch and Semi-Continuous Performance in Anaerobic Reactors](#) (2026)

DOI: doi.org/10.3390/en19174164

(Adatbázis: MDPI)

Giulia De Cet et al: [Demolition Management for Sustainability: Framework and Case Study](#) (2026)

DOI: doi.org/10.3390/su18179017

(Adatbázis: MDPI)

Nelson Azevedo Santos Teixeira de Mello et al.: [From Storage to Release: How Depth, Temperature and Sediment Texture Structure Methane Partitioning in a Tropical Lake](#) (2026)

DOI: doi.org/10.3390/limnolrev26030052

(Adatbázis: MDPI)

Bushra Danish Talpur et al: [Evaluation of Workability Parameters of Straw-Reinforced Earth-Based Materials for Extrusion-Based 3D Printing](#)(2026)

DOI: doi.org/10.3390/buildings16132588

(Adatbázis: MDPI)

Mathhar Bdour et al: [Environmental and Economic Assessment of a Solar-Powered UF-RO Brackish-Groundwater Desalination System for Irrigation in the Jordan Valley](#) (2026)

DOI: 10.3390/w18172128

(Adatbázis: MDPI)

Karla S. Mendez et al.: [Evaluating Microbial Health Risks Associated with Direct Potable Water Reuse](#) (2026)

DOI: doi.org/10.3390/pollutants6030046

(Adatbázis: MDPI)

Muheeb Awawdeh et al.: [Water Diplomacy Index: A Tool for Evaluating Cooperation on Shared Water Resources](#) (2026)

DOI: doi.org/10.3390/w18172116

(Adatbázis: MDPI)

Benjamin Oritsemuelebi et al: [Human and environmental health risks of drugs in the environment](#) (2026)

DOI: 10.1007/s44274-026-00692-6

(Adatbázis: Springer)

Parag Biswas et al.: [An Extensive and Methodical Review of Smart Grids for Sustainable Energy Management- Addressing Challenges With AI, Renewable Energy Integration, and Leading-Edge Technologies](#) (2026)

DOI: 10.1109/ACCESS.2025.3537651

(Adatbázis: *IEEE*)

Mohammed Saber Eltohamy et al: [Enhancing Electric Grid Flexibility for the Integration of Variable Renewable Energy: Challenges, Innovations, and Future Directions](#) (2026)

DOI: 10.1109/ACCESS.2026.3660837

(Adatbázis: *IEEE*)

Könyvajánló a témában:

Veresné Somosi Mariann et al: [A fenntarthatóság holisztikus megközelítésben](#) (2023)

DOI: 10.1556/9789634549314

(Adatbázis: *MERSZ*)

Gelencsér András: [Ábrándok bővületében : A fenntartható fejlődés korlátai](#) (2022)

DOI: 10.1556/9789634548584

(Adatbázis: *MERSZ*)

Berta Renáta: [Mit is iszunk? Mikroműanyag-problémák, jelenlegi helyzet](#) (2022)

DOI: 10.1556/9789634548508

(Adatbázis: *MERSZ*)
